

# Co-op Education AT SELKIRK COLLEGE

## 'Education At Work'

### **Renewable Resources** – Renewable Energy Technician Program

#### **Program Objectives:**

The Certificate in *Renewable Energy Technician* Program is a new program of study in the exciting realm of Renewable Energy Technologies. This entry level program covers two semesters of study in the many diverse technologies that make up renewable energy. The program is delivered at two Selkirk college Campuses in Nelson BC. The one year certificate prepares students for entry level jobs in areas such as energy auditing, public education of renewable energy options, site evaluation and data collection.

The realm of Renewable Energy is evolving rapidly, and involves many professionals from architects and engineers to biologists, chemists, electricians and hearing specialists. The certificate prepares graduates to work with these professionals in a supporting capacity, and is designed to provide a foundation to a career that can be pursued in a variety of disciplines as the realm of Renewable Energy evolves.

#### **Co-op Education Objectives:**

Co-op Education is a process of education that formally integrates students' academic study with periods of related work experience in cooperating employer organizations. Selkirk College's Co-op Education programs are designed within guidelines established by the Canadian Association for Co-operative Education (CAFCE) and in consultation with federal and provincial government agencies.
